First Philadelphia-Area College to Participate in Internet Essentials Program Designed to Close the Digital Divide

As part of its continued efforts to eliminate roadblocks to a college degree for non-traditional learners, [Peirce College](#), a 152-year-old Philadelphia non-profit higher education institution for working adults, has become the first Philadelphia-area college to partner with [Comcast](#) to offer low-cost Internet service and access to affordable computers to its students through the [Internet Essentials](#) program.

Launched in 2011 to bridge the digital divide by offering low-cost Internet access, affordable computers and free digital literacy training, Philadelphia-based Comcast has expanded the program to include Peirce as a regional partner, increasing access and ease of enrollment for Peirce students across all income levels.

As digital access has presented an obstacle to enrollment and graduation for many, this partnership will ensure the College's working adult learners have the tools they need to successfully complete their degree and prepare them to navigate work environments that are increasingly becoming more technologically advanced.

"Together, Peirce and Comcast are equipping our students with the support they need to succeed academically, professionally and personally," said Peirce College President and CEO James J. Mergiotti. "This partnership will eliminate many of the barriers to advancement experienced by our students and their families, allowing them to earn their degree, build their careers and support their families for generations to come."

In alignment with the college's two-generation approach to education and workforce development, the in-home computer and Internet service provided by the program will also help bridge the digital divide for students' children and other family members.

"Peirce College is a leader in providing adult learners with the skills they need to achieve their goals and pursue rewarding careers," said Tom Karinshak, Executive Vice President of Customer Service for Comcast Cable and Peirce College Trustee. "By offering a low-cost Internet connection and computer, Internet Essentials will empower Peirce students to access educational resources not just at school but also at home. Students need support at every level of their education, and this collaboration highlights our commitment to providing them the resources they need throughout their journey."

Since its inception, more than 4 million people have benefited from the Comcast Internet Essentials program. Comcast is also running a pilot program for community college students in Colorado and Illinois.

To be eligible, participants must be currently enrolled in Peirce classes and live within the Comcast footprint. The program includes 15/2 Mbps Internet for \$9.95 per month + tax, access to low-cost computers for \$149.99 + tax, free in-home WiFi, and 40 hours of access to Xfinity WiFi hotspots per month.

Enrollment in Comcast Internet Essentials is available now for all current Peirce students. More information about the partnership is available by contacting Uva Coles, Vice President of Institutional Advancement and Strategic Partnerships, at [ucoles@peirce.edu](mailto:ucoles@peirce.edu).

### **About Peirce College**

Founded in 1865, Peirce College has been providing working adults with affordable education, flexible classes, and personalized support for more than 150 years. Peirce offers bachelor and associate degree programs in the areas of Business, Healthcare, Information Technology, and Legal Studies, and Master of Science degrees in Healthcare Administration and Organizational Leadership & Management. Located in the heart of Philadelphia, Peirce is a non-profit institution that specializes in serving the unique needs of working adults through both online and on campus education. In 2015, Peirce took life-friendly learning and degree attainment to the next level with the creation of Peirce Fit®, a revolutionary learning format that allows students to choose each week whether to attend class in person or online. Through competency-based education in Peirce's IT program, students may also choose a faster, more affordable path to a degree. Peirce College is accredited by the Middle States Commission on Higher Education, 3624 Market St. Philadelphia, PA 19104 (267-284-5000). Additionally, select programs are accredited by The Accreditation Council for Business Schools and Programs, the American Bar Association and the Commission on Accreditation for Health Informatics and Information Management Education.

## **Title: Comcast, Peirce College strike Internet Essentials deal**

**Author:** Philadelphia Business Journal

**Link:** <https://www.bizjournals.com/philadelphia/news/2017/09/21/comcast-peirce-college-internet-essentials.html>

**Date:** September 21, 2017

[Comcast Corp.'s Internet Essentials program](#) is beginning to expand its low-cost internet service to college campuses, and just signed on its first school in the Philadelphia region.

The Philadelphia-based technology and broadcast giant announced Wednesday it's teaming up with [Peirce College](#) in Center City to open the program to all students enrolled at the school. The partnership comes as Comcast is testing out a pilot program at community colleges in Illinois and Colorado to connect students on those campuses with the service.

Peirce caters toward nontraditional students and adults by offering occupationally focused programs in areas with increasing demand, including health care and cyber security. It launched the Comcast partnership at a Wednesday night event that saw 20 students enroll.

“Together, Peirce and Comcast are equipping our students with the support they need to succeed academically, professionally and personally,” [Peirce College](#) President and CEO [James J. Mergiotti](#) said in a statement. “This partnership will eliminate many of the barriers to advancement experienced by our students and their families, allowing them to earn their degree, build their careers and support their families for generations to come.”

Internet Essentials was launched in 2011 in tandem with government approval of Comcast's acquisition of NBCUniversal and has signed up 4 million customers so far. As part of the program, customers have access to 15 Mbps speed internet for about \$10 a month, at-home Wi-Fi and access to 40 hours of out-of-home Wi-Fi through Comcast's wireless hotspots. Participants in the program can also buy a low-cost computer for about \$150 and the company funds digital literacy training through community partners.

The program is aimed at bridging what's described as the “digital divide,” or the gap between low-income families that can't afford at-home internet while that access is now seen as critical for students to perform well in school and for adults to find jobs or access basic needs like health care.

In Comcast's home city, more than 400,000 people live below the federal poverty line and about 125,000 individuals are connected to the internet through Internet

Essentials. When the program first rolled out in the region, the company saw low adoption rates, but a new administration coming into the city's school district helped turn that around, Comcast Senior Executive Vice President [David L. Cohen told the Philadelphia Business Journal last month](#). It now has the third highest adoption rate after Chicago and Houston.

**Title:** Comcast Just Rolled Out Internet Essentials to Peirce College Students

**Author:** <http://www.phillymag.com/business/2017/09/21/comcast-internet-essentials-philadelphia-college/>

**Link:** <http://www.phillymag.com/business/2017/09/21/comcast-internet-essentials-philadelphia-college/>

**Date:** September 21, 2017

This week, **Peirce College** officially became the first Philadelphia-area higher education school to partner with **Comcast on Internet Essentials**. The school's students, many of whom are working adults, are now eligible for the low-cost internet service and affordable computers.

To be eligible, participants must be currently enrolled at Peirce classes and live within the Comcast footprint. The program includes 15/2 Mbps internet for \$9.95 per month plus tax, access to low-cost computers for \$149.99 plus tax, free in-home WiFi, and 40 hours of access to Xfinity WiFi hotspots per month.

"Together, Peirce and Comcast are equipping our students with the support they need to succeed academically, professionally and personally," said Peirce College president and CEO **James J. Mergiotti** in a statement. "This partnership will eliminate many of the barriers to advancement experienced by our students and their families."

Additionally, in alignment with the college's two-generation approach to education and workforce development, the computer and internet service can help bridge the digital divide for students' children and other family members.

"Internet Essentials will empower Peirce students to access educational resources not just at school but also at home," said **Tom Karinshak**, EVP of Customer Service for Comcast Cable and Peirce College Trustee. "Students need support at every level of their education, and this collaboration highlights our commitment to providing them the resources they need throughout their journey."

The partnership with Peirce College follows Internet Essentials pilot programs Comcast has been running with community schools in Colorado and Illinois. The company says more than 4 million people have benefitted from the program since its inception in 2011.

Comcast has rolled out other Internet Essentials expansion initiatives — like bringing the program to seniors or those in public housing — but [hasn't revealed how many individuals are enrolled under each subset](#).
